

11th International Workshop on Serverless Computing

<https://www.serverlesscomputing.org/wosc10/>

December 15, 2025

Part of ACM/IFIP International Middleware
Conference 2025 (Dec 15-19)

WoSC11 Organization

Previous workshops:

[10th International Workshop on Serverless Computing](#), Part of ACM/IFIP Middleware 2024 in The Hong Kong Polytechnic University, Hong Kong, China, Dec 2-6, 2024.

[9th International Workshop on Serverless Computing](#), part of ACM/IFIP International Middleware Conference, December 11-15, 2023 in DAMSLab, Department of Arts, University of Bologna, Italy

[8th International Workshop on Serverless Computing](#), Part of ACM/IFIP International Middleware Conference, November 7-11, 2022 in Québec, Canada

[Seventh International Workshop on Serverless Computing \(WoSC\) 2021](#), Virtual Location, Part of Part of 22nd ACM/IFIP International Middleware Conference, Dec 6-10, 2021 (Online-only).

[Sixth International Workshop on Serverless Computing \(WoSC\) 2020](#), Virtual Location, Part of [ACM/IFIP International Middleware Conference](#).

[Fifth International Workshop on Serverless Computing \(WoSC\) 2019](#) in UC Davis, CA, USA, Part of [Part of 20th ACM/IFIP International Middleware Conference](#)

[Fourth International Workshop on Serverless Computing \(WoSC\) 2018](#) Thursday, December 20, 2018 in Zurich, Switzerland, Part of [11th IEEE/ACM UCC](#) and [5th IEEE/ACM BDCAT](#)

[Third International Workshop on Serverless Computing \(WoSC\) 2018](#) in San Francisco, CA, USA on July 2nd, 2018 part of [IEEE CLOUD 2018](#)

[Second International Workshop on Serverless Computing \(WoSC\) 2017](#) in Las Vegas, NV, USA on December 12th, 2017 part of [Middleware 2017](#)

[First International Workshop on Serverless Computing \(WoSC\) 2017](#) in Atlanta, GA, USA on June 5th, 2017 part of [ICDCS 2017](#).

On-site workshop chairs

Aniruddha S. Gokhale and Kaiwen Zhang

Workshop co-chairs

Paul Castro, IBM Research

Pedro García López, University Rovira i Virgili

Vatche Ishakian, IBM Research

Vinod Muthusamy, IBM Research

Aleksander Slominski, IBM Research

Website support

Enrique Molina, University Rovira i Virgili

Steering Committee

Geoffrey Fox, Indiana University

Dennis Gannon, Indiana University & Formerly Microsoft Research

Arno Jacobsen, MSRG (Middleware Systems Research Group)

Ongoing Serverless Workshops

We are planning to do another serverless workshops in 2026.

Please join mailing list for updates: <https://groups.google.com/g/future-compute>

Stay connected! Scheduled workshops are announced at BlueSky/X/Twitter:
[@wosc17](#)

Check our website for WoSC and WOSCx (online focused workshops):

WoSC11 Program Committee

Alexandru Iosup, Vrije Universiteit Amsterdam

Ali Kanso, Microsoft

Amine Barrak, Oakland University

Azer Bestavros, Boston University

Cristina Abad, Escuela Superior Politécnica del Litoral (Ecuador)

Dennis Gannon, Indiana University & Formerly Microsoft Research

Eric Rozner, University of Colorado Boulder

Geoffrey Fox, Indiana University

Gul Agha, University of Illinois at Urbana-Champaign

Hans-Arno Jacobsen, MSRG (Middleware Systems Research Group)

Ian Foster, University of Chicago and Argonne National Laboratory

Josef Spillner, Zurich University of Applied Sciences

Kyungyong Lee, Kookmin University

Lucas Nussbaum, LORIA, France

Maciej Malawski, AGH University of Science and Technology, Poland

Maciej Pawlik, Academic Computer Centre CYFRONET of the University of Science and Technology in Cracow

Marc Sánchez Artigas, Universitat Rovira i Virgili

Per Persson, Ericsson Research

Peter Pietzuch, Imperial College

Rich Wolski, University of California, Santa Barbara Rodric Rabbah, Nimbella and Apache OpenWhisk

Rodrigo Fonseca, Microsoft Research Samuel Kounev, University of Wuerzburg

Samuel Kounev, University of Wuerzburg

Tyler R. Caraza-Harter, University of Wisconsin-Madison

Višnja Križanović, Josip Juraj Strossmayer University of Osijek

Volker Hilt, Bell Labs (Nokia)

Wes Lloyd, University of Washington Tacoma

WoSC11 Important information

Everything is linked from WoSC11 website program page (including these slides):

<https://www.serverlesscomputing.org/wosc11/>

Staying on schedule is very important. Please respect time limits for talks, we use “duck quack” sound 5 minutes before your time ends and double quack when you reached end of your allocated time. Zoom stays open during breaks. Use Discord channel **#wosc11** for questions as Zoom chat is gone after we finish the workshops.

How to ask questions? Raise virtual hand to ask live questions, you can also use Discord to ask questions in #wosc11 channel. To join use this Discord use this invite link:

<https://discord.gg/pQvmu5gV>

Please join mailing list for updates: <https://groups.google.com/g/future-compute> and follow @wosc17 on BlueSky

WoSC11 Keynote: The Future of Serverless in 2025 and Beyond

What does "serverless" still mean in 2025-2026? Do you still want to explore, build, and ship faster than ever? Do you want to understand how AI and serverless are converging? Join this session to peek into the future while learning from the past.

Julian Wood is a Principal Developer Advocate at Amazon Web Services (AWS) who helps developers transform the way they build and run applications using serverless technologies.

Ask your questions in Discord [#wosc11](#) channel or in Zoom chat, we may also have live questions from the local and remote audience.

Online polls!

Connect to the link and give us your view on serverless.

Online poll question: What are the main challenges in Serverless Computing?

Answers from WOSCx1 (June 2022), WOSCx2 (June 2023), WoSC9 (Dec 2023), WOSCx3 (June 2024)

What are the main challenges in serverless computing ?

Online poll question: What is the future of Serverless Computing?
Answers from WoSC10 (Dec 2024)

What is the future of Serverless Computing?

22 responses

What are current challenges for serverless AI?

○ edge intelligence, geo-distributed AI services

👍 9 on "What AI topics we should have for future workshops? And other topics? "

○ How to make serverless AI that runs without changes from laptop to cloud to edge and anywhere else and is easy to maintain

👍 9 on "What AI topics we should have for future workshops? And other topics? "

○ Would vibe coding individual serverless functions be a thing? How can we ensure that vibe-coded serverless applications remain compliant?

👍 4 on "What AI topics we should have for future workshops? And other topics? "

○ Serverless AI toolkits and IDEs simplifying the entire experience

👍 4 on "What AI topics we should have for future workshops? And other topics? "

○ How to compose multi-agent autonomic-computing for managing distributed serverless workflows on IoT-Edge-Cloud Continuum?

👍 2 on "What AI topics we should have for future workshops? And other topics? "

Online poll questions

“Old” questions:

- What are the challenges of Serverless Computing?
- What is the future of Serverless Computing?

New question:

- *What are current challenges for serverless AI?*

<https://www.menti.com/>

What are the main challenges of Serverless Computing?

What is the future of serverless ?

What are the main challenges in Serverless AI?

Your Feedback

Please tell us what works and what does not work.

Google feedback form:

<https://forms.gle/qQQPVyTN5ebq47hE6>

Only two questions: feedback or comments (no email address required)

Or contact us using BlueSky/X/Twitter: @wosc17

Your feedback really matters to us - and to you (to get better workshop in future!)
